

ARCHITECTURAL FACADES

GET THE DURABILITY AND LOW MAINTENANCE OF A SHELTER WORKS FIBERGLASS SHELTER WITH THE APPEARANCE OF TRADITIONAL MASONRY CONSTRUCTION

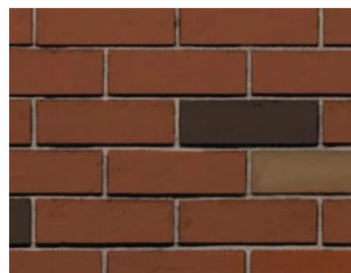

Shelter Works architectural façades provide an alternative for projects where the appearance of a traditional building is preferred or required. Realistic brick finishes allow Freedom Series fiberglass shelters to complement surrounding architecture while maintaining the performance advantages Shelter Works is known for.

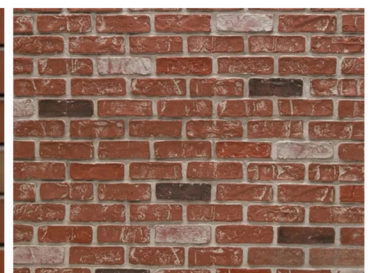

- **REALISTIC BRICK APPEARANCE**- Molded texture and depth create the look of traditional masonry.
- **WEATHER-RESISTANT EXTERIOR** - Polyurethane façade panels withstand moisture, heat, sunlight, and changing weather conditions.
- **IMPACT RESISTANT** - Strong and durable dual-layer composite maintains appearance.
- **IMPROVED ENERGY EFFICIENCY** - Increases the enclosure's base thermal performance by R-5.
- **MADE IN THE USA**

IDEAL FOR

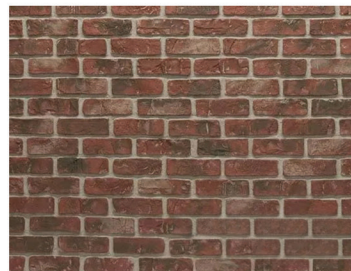

- Residential facilities
- Planned communities
- Corporate campuses
- Educational campuses
- Parks and recreation areas
- Commercial developments
